

## **ANNOUNCEMENT**

### **Seminar on**

### **Evolving Technologies and their Applications in the Field of Geotechnology**

In view of the ongoing infrastructure development and its sustainability, inputs from various science and engineering disciplines will help in analyzing various intricate issues and suitably design facilities intended to raise quality of life. In this respect a two-day seminar entitled "Evolving Technologies and their Applications in the field of Geotechnology" is organized jointly by the Geological Society of India and Global Academy of Technology in the month of November 2008. The proposed themes for the seminar are:

- Transportation Schemes
- Hydro Electric projects
- Water resources

Papers are invited on specific areas relating to planning, investigation, and implementation of various projects such as dams, tunnels (metro, hydro-electric, transportation etc), underground structures, transportation structures (bridges, interchanges etc), urban water projects etc and the challenges and opportunities embracing the field of GEOTECHNOLOGY relevant to the proposed themes of the seminar.

#### **Registration and Call for Abstracts**

Interested persons may register and submit the abstracts on or before 15<sup>th</sup> October 2008. Extended abstracts not exceeding 500 words are invited on the focal themes, which can be submitted to the convener by email or post in hard copy typed double space on A4 size paper preferably with a soft copy on CD in MS word format. The abstract should bear title of the paper, name(s) of the author(s), organization and address including email address of the corresponding author.
