

inspiration, support and encouragement throughout my career. I was fortunate to start my research with Prof. B. Mahabaleswar during 1982. His constant encouragement, continued support and stimulating discussions greatly helped me to shape my career. In later years (1988-2005) Prof. Mahabaleswar and myself together developed collaborative research programs with internationally reputed French group from Geosciences, Rennes, on the Precambrian Lithosphere in Southern India. These collaborative research programs enabled me to carryout multidisciplinary research involving structural geology, tectonics, geochronology and geochemistry on Precambrian terrains of southern India. During those 17 years I had spent much time in field and French laboratories which were most fruitful and rewarding period in my career. I am extremely grateful to my French collaborators Prof. Jean-Jacques Peucat, Prof. Herve Martin,

Prof. Pierre Choukroune and Prof. Dominique Chardon whose invaluable support, encouragement and academic interactions have greatly strengthened my research career. In the late nineties I began to work with Japanese collaborators on the Archaean ultramafic magmatism and thermal history under JSPS funded international programs, which provided me further access to advanced analytical facilities. I am extremely grateful to Prof. Takashi Kano (Yamaguchi University) for stimulating discussions, great care, affection and constant support. I also wish to express my sincere gratitude to Dr. S.M. Naqvi, Dr. M. Ramakrishnan, late Prof. A.S. Janardhan, Sri. R.H Sawkar, Sri S.V. Srikantia, Dr. M.S. Rao and several senior colleagues from Universities and national laboratories for fruitful interactions and encouragement.

I am immensely thankful to all esteemed colleagues in the Department for their encouragement and support.

I am thankful to my parents for their invaluable sacrifices in shaping my career, my wife Latha, children Swathi and Kishan for their patience and support without which it would have been very difficult to pursue scientific research.

The Bellur Rama Rao Birth Centenary Award provides me further encouragement to devote myself to problems of the Precambrian geology of India. I thank the Geological Society of India once again for this honour.

## Announcement

### LAKSHMESWAR RAMA RAO BIRTH CENTENARY RESEARCH GRANTS: 2008-09

A sum of Rs.10,000/- shall be made available during the financial year 2008-09 to young research scholars for carrying out laboratory and field work in the field of palaeontology and stratigraphy.

Those interested in seeking assistance are requested to apply to the Society furnishing full particulars of academic qualifications, synopsis of the research project they are engaged in and the extent of assistance required. The application should be supported by their Research Guide and the Head of the Institution and reach the Secretary, Geological Society of India, No.63, 12th Cross, Basappa Layout, Gavipuram PO, P.B. No.1922, Bangalore - 560 019. **Telefax:** 080-26613352; **Phone:** 080-22422943; **Email:** gsocind@gmail.com **on or before 31st March 2008.**
