Memoir 52

Milestones in Petrology and Future Perspectives

Editor: Anand Mohan

This Memoir brings together papers presented at the Workshop on "Milestones in Petrology at the End of the Millennium and Future Perspectives" held at Banaras during 14-16 November, 2000 under the auspices of the Geological Society of India and the Banaras Hindu University.

Petrology or the study of rocks in minutest detail constitutes a basic sub-discipline of geology and is indispensable in understanding various geological, geophysical and geochemical processes in Earth's history and its continuing evolution. Articles compiled in this volume reflect in a way the present status of our knowledge in many areas of petrology in general and metamorphic petrology in particular.

Ably edited by Dr. Anand Mohan, the compilation includes contributions from well known workers in the field of petrology from India and abroad. It will be of special value to teachers, researchers and post-graduate students of geology in updating their knowledge from the reviews on current advances in petrology globally, metamorphic evolution of granulites in particular to many specific petrological studies in igneous, volcanic and metamorphic provinces/belts of the Indian shield.

Pages: 472 + xvi (2003); Price: Rs.750/-

(Copies can be supplied at concessional price to Fellows and bonafide students.
